	Examiner Árpád Fábíán Kovács	Art Unit 3671	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 19-27, 45-51 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 9/30/2004. But there were no arguments provided.
2. This application contains claims 19-27, 45-51 drawn to an invention nonelected with traverse in Paper No. dated 9/30/2004. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 28-41, 43 are rejected under 35 U.S.C. 102(b) as being anticipated by Kimura (5802850).

Kimura discloses:

A pump (20) located within the housing (hydraulic cylinder housing ref 16) and operable to generate the pressure differential in the housing;

A piston/rod/lever (ref 54, 12);

Art Unit: 3671

In re claim 40: it is functionally recited that "for a clutch...", it is noted that the device would be capable to be utilized for other purposes, such as for a clutch/brake assembly (see col. 5, ln 14-19);

In re claim 41: a spring between the rod & the lever (ref 52).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-18, 42, 44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kimura (5802850).

Kimura discloses the claimed device except for using air compressor instead of the fluid pump.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to pick & choose between an air compressor & an fluid pump, since it is well known to utilize either in actuating a cylinder.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize the device of Kimura as taught in col. 5, ln 14-19, for other uses, such as for a mower, having typical mower elements.
